Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

Running a business is hard, and expensive. As a business owner or manager, you need to get the most out of every dollar you invest, and that is why choosing a company with experience is so important. We provide a variety of services that range from design and implementation to our fully managed services, which are designed to increase your company's bottom line.

With our IT managed support services, you can be freed from the day to day management and maintenance of your network components, freeing you up to focus on your core products and services.

With more than 15 years for professional experience in consulting and staff placement we are experienced enough to handle any size projects. We support both Small Businesses and Large Corporations.

CUSTOM SOLUTIONS

Given our strong focus on information technology, PinnacleWare is able to integrate technology products, consulting, support and staffing into a comprehensive solution designed to meet your ever-changing business requirements.

WEB SOLUTIONS

We have some of the most knowledgeable web developers in the industry. This gives the advantage in providing small to large scale web development solutions. We can design and host your web sites in house or at your facility.

BUSINESS SOLUTIONS

At PinnacleWare we have the perfect small business solution for you company. Our solution includes a turn key network setup complete with:

- Active Directory
- Email System
- Printing Solution
- Backup , Recovery and more..

ENTERPRISE MANAGEMENT SERVICES

Companies with less than 200 network clients often have sophisticated, enterprise-class IT infrastructures, but rarely have internal IT staffs with the in-depth technical expertise to provide all the IT support that complex networks require. Internal resources are often overworked and budgetary realities do not permit hiring additional full-time IT staff. At PinnacleWare we have a solution for you. Call us today to find your solutions.

APPLICATION MANAGEMENT

After production deployment, an application needs to be managed and maintained on an on-going basis. Application management involves stabilizing, sustaining and growing an application on a sustainable basis that meets the growing needs of the end users. Applications, that are unstable or are divergent from the needs of business users, can have a huge impact on business and on IT.

It is, therefore, critical that business applications are managed proactively by a team that is dedicated to the purpose of managing and growing the application. We manage a number of enterprise level applications such as:

- Active Directory
- VMware ESXi
- SharePoint
- Windows Server Update Services (WSUS)
- MS Office
- Quick Books
- Exchange Email and more..

simplifying IT

PinnacleWare has been helping clients with their technology and staffing needs since 2007. We are confident and experienced, let us help with your consulting and staffing needs.

We consult for small and large groups regardless of the company's overall size. In some cases this means a small business, in other cases it means a small group within a large company. Every case can be broken down into small groups. We assist company's in making their small groups work better.

We take great pride in our independence from vendors, manufacturers, and providers. We believe in developing solutions that best fit the situation and not forcing any one particular solutions or setup.
